Телекоммуникационные базовые, профессиональные станции, контейнеры

Техническое описание

PROFESSIONAL FOR RENTAL

STANDARD FEATURES

- Covering full range of silent generator sets
 - Attractive and weather-proof design can be used in harsh environments
 - Multi-lifting at the top & bottom is designed for easy transfer
 - Unique inlet and outlet duct design prevents debris and dust inhaled
 - Perfect in and out of the wind system ensures the normal operation
 - Large capacity fuel tank with double layer structure ensures the generator set to run at full load for 12 to 24 hours and no leakage
 - IP65 Control box and distribution box design
 - The electric leakage protection function in looping circuit ensures safety performance
 - International standard plug connector and outer terminal guarantees quick, safe & convenient operation
-

1000 HOURS MAINTENANCE FREE SOLUTION

The biggest operating cost of a genset comes from the routine maintenance except for the fuel consumption cost. Generally, the A-class maintenance interval of the diesel engine defined by the diesel engine manufacturer requires each 250 running hours, including the replacement of lubrication oil and filters. The operating expenses are not only limit to maintenance parts, but also labor cost and transportation, especially in the unattended remote areas. Extending the routine maintenance interval is significant to reduce the operating cost. Regardless of a DC genset or an AC genset, Yanan Telecom's purpose-built gensets with the following solutions that allows a genset to run for 1000 hours without maintenance.

- Extended oil sump increases the lub oil capacity
- Automatic lub oil refill system with precision control
- Enlarged air filter and additional air inlet pre-filter
- Additional fuel pre-cleaner
- Enlarged lub oil filter
- Expanded coolant overflow tank
- Maintenance free starting battery

AUTOMATIC LUB OIL REFILL SYSTEM

Refill the consumed lub oil automatically and maintain the lub oil level at the specified height.

EXTENDED OIL TANK

Which can last for 1000 hours running (Lub oil capacity subject to the different engine model).

SELF-CLEANING AIR INLET PRE-CLEANER

Eliminate the 99% of particles $\geq 20\mu\text{m}$ to maximize the life of the air filter element.

Enlarged air filter:

Larger filter area to extend the replacement cycle

ENLARGED FUEL FILTER

Larger size filter to extend the replacement cycle

EXPANDED COOLANT OVERFLOW TANK

Storage of more coolant to compensate the loss during the running

ENLARGED LUB OIL FILTER

Larger filter area to extend the replacement cycle

Note: 1000 hours maintenance free system exclude the run in oil change for a new engine. It's only applicable after the first run in oil change as per engine manufacture's recommendation of the replacement at running 50 to 150 hours for the first time.

Container

Standard Features

- ISO standard 20ft,30ft, 40ft and 40HQ shipping container with COC from CCS
- Walk around interior with access doors on each side
- Highly corrosion protection container painting .
- Integrated radiator or separating radiator according to the design
- Large flux and quick charge cooling fan
- Automatic fuel fill system
- External fuel connections
- Heavy duty fuel filter with water separator
- Integrated AC and DC lighting
- Multiple cable entry access points
- Lifting capability for full weight via corner castings
